NO FISHING FOR JAȘ (CHINOOK) AND TS'EMAN (SOCKEYE)

August 8, 2024

Jaș and Ts'eman populations returning to Tsilhqot'in Territory are in a state of **extreme conservation concern** due to the severe impacts of the Tsilhqox (Chilcotin River) Landslide on very low 2024 salmon returns.

The Tsilhqot'in Nation Council of Chiefs requests that all members **do not harvest** Jaș or Ts'eman anywhere in Tsilhqox, Cheșqox, or Dasiqox (Chilcotin, Chilko, or Taseko) waters to aid in their recovery and long-term sustainability.

The priority is to **maximize the spawning success** of Jaș and Ts'eman populations that spawn in Tsilhqot'in Territory.

We can all help protect severely impacted Jaș and Ts'eman for the future by allowing them to safely return to their spawning grounds.

For questions or more information please contact
