

T̨silhqot'in Fisheries Plan - 2026 Salmon Season

Approved by the Tâilhqot'in Council of Chiefs, June 4, 2026

The TNG Fisheries team anticipates a good return of summer Ja's and Ts'eman to support traditional fisheries on both the Chilcotin and Fraser River mainstems.

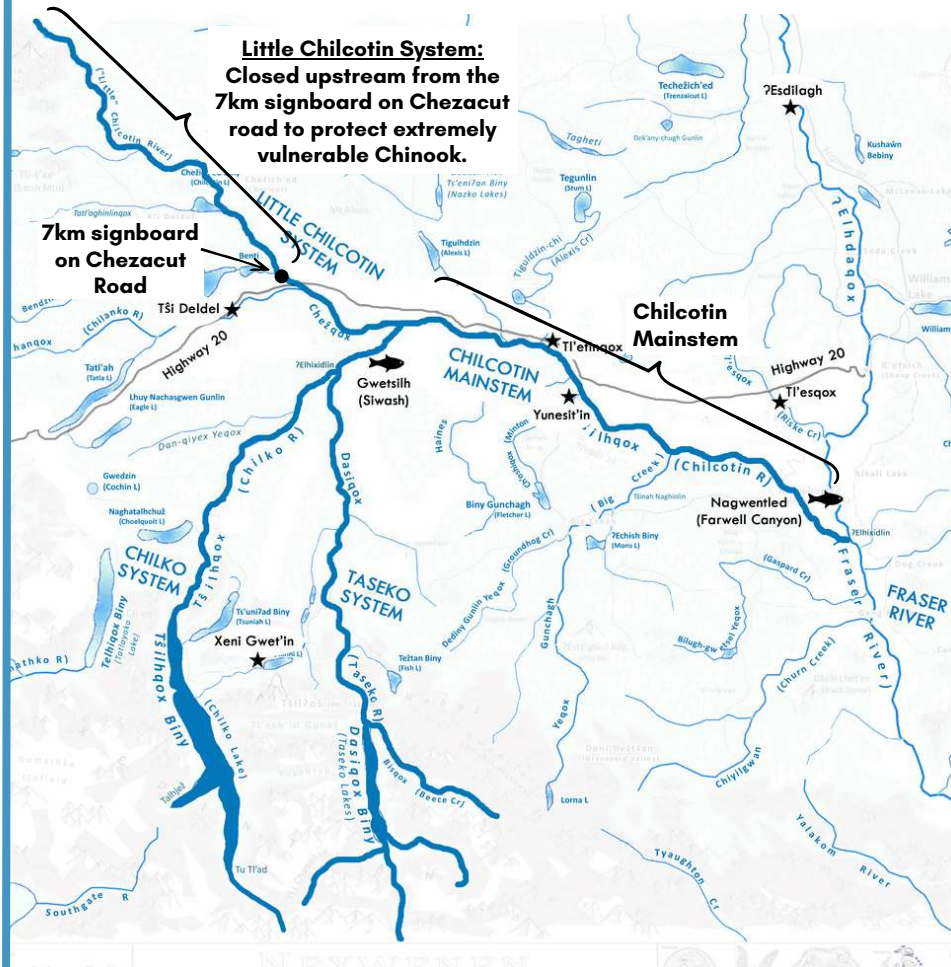

Two early-timed populations remain at a high risk of extirpation (local extinction). The T̓silhqot'in Council of Chiefs requests voluntary compliance with limited measures to protect these 2 specific populations – Upper Chilcotin Ja̓s (Chinook) and Taseko Ts'eman (sockeye).

**REQUESTED VOLUNTARY
PROTECTION MEASURES FOR THE
MOST VULNERABLE JA'Û AND
TS'EMAN:**

#1. If you can, please delay harvest of Jaš in the Chilko/Chilcotin mainstem until **Friday, July 10, 2026** when the stronger Chilko and Lower Little Chilcotin Jaš populations will be in the Territory and allow critically endangered early-timed Upper Chilcotin Jaš to continue to their spawning grounds.

#2. If you can, please delay harvest of Ts'eman in the Chilko/Chilcotin mainstem until **Thursday, August 6, 2026** when the stronger Chilko Ts'eman population will be in the Territory and allow critically endangered early-timed Taseko Ts'eman to continue to their spawning grounds.

#3. Please do not fish for Jaś in the Little Chilcotin system upstream from the 7km signboard on the Chezacut road for the full fishing season to protect the critically endangered Upper Chilcotin Jaś.

We can all help protect our at-risk Ja'ê and Ts'eman populations for the future by allowing them to safely return to their spawning grounds.

Please Note: Fishery opening dates may be adjusted in-season as more information becomes available, and under extreme circumstances, emergency conservation measures may be implemented.
